EXPERIENCE

FlyRank AI Frontend AI Engineer Intern	Remote July 2026 – Present
- Completing the Front-end AI Engineering track: structuring responsive pages and reusable UI blocks with React/Next.js and Tailwind CSS, translating design briefs into pixel-accurate, mobile-optimized layouts - Building storefront-pattern components (product cards, collections, CTAs, navigation) for a Shopify/Shopline-style ecommerce project - Practicing an AI-assisted engineering workflow across Cursor, GitHub Copilot, Claude, and Google Antigravity — prompting for code and orchestrating agentic tasks, then independently verifying responsiveness, accessibility, and visual fidelity	

PLP Smart Entrance/Exit & Attendance Monitoring System Tech Development Lead, Pamantasan ng Lungsod ng Pasig	Pasig City Feb 2026 –May 2026
- Led a 10-member development team as Tech Development Lead, building an integrated smart entrance, exit, and attendance monitoring system with data analytics for institutional decision support at PLP - Pioneered and initialized the system's primary UI/UX design and led frontend development, establishing the glassmorphism visual language and Bootstrap 5 component system used across the platform - Automated QR code-based entrance/exit monitoring for students, enforcing campus hours and enabling real-time location logging (Inside/Outside status) - Directed integration of a parallel attendance monitoring system for PLP employees at institutional events and flag ceremonies, including automated department-level participation tracking - Supervised the analytics layer (peak-flow congestion heatmaps, tardiness heatmaps, predictive anomaly detection) and automated SMS notification infrastructure delivering real-time alerts to department heads	

PROJECTS

StudioSprint: Smart Workforce Optimization Platform Fullstack Developer Lead Researcher	2026
- Co-developed a workforce optimization platform designed for startup tech companies, built on Laravel + React/InertiaJS + PostgreSQL (multi-tenant via path-based routing), with a Python/FastAPI machine learning engine for predictive project timeline and resource allocation. - Designed a Graph Neural Network–based developer-task matching engine (PyTorch Geometric) blended with semantic cosine similarity for cold-start studios, guarded by a Critical Path Method engine for deterministic scheduling validation	

Lumora: AI-Powered E-commerce Platform for Local Artisan Merchants UI/UX Lead & Frontend Engineer	2026
- Led UI/UX design and frontend implementation for a two-sided marketplace featuring NLP-based smart search and auto-tagging for handmade/creative-arts product listings - Engineered the UI/UX design and frontend implementation of the entire platform and managed data scraping and data acquisition for seven beta-sellers with over 88 products. Led QA testing across the system	

Bayt Al Qudra Physiotherapy Clinic Management System UI/UX Lead Fullstack Developer	2026
- Designed and built the entire frontend design system (aurora mesh background, breadcrumb navigation, unified toast notification component) for a 3-role (Admin/Therapist/Patient) Laravel clinic management platform - Built the patient portal end-to-end: booking form redesign, AJAX-powered filters, unified calendar-scheduling component, session completion workflow, and an interactive recovery progress tracker with HEP compliance logging - Implemented threaded messaging with unread notification badges and profile security/account management settings - Redesigned the public-facing site (blog moved from modals to editorial pages, dynamic testimonial carousel with admin management) and built the staff clinical dashboard with BI reporting tools - Fixed critical bugs including session-recording data loss and a missing anatomical pain map in PDF exports	

EDUCATION

PAMANTASAN NG LUNGSOD NG PASIG BS Computer Science (GWA 1.25 – 1.60)	Pasig City 2023 – Present
Honors: CHED Merit Scholarship Program Awardee (2023 – Present), Pasig City Scholar (2023 – Present)	

TECHNICAL SKILLS

Language: PHP, JavaScript, TypeScript Python, Java, SQL, HTML/CSS	
Frameworks & Libraries: Laravel, React, InertiaJS, Next.js, Tailwind CSS, Bootstrap 5, Flask, FastAPI, PyTorch Geometric, LangChain	
Data, AI & Infrastructure: PostgreSQL, MySQL, Groq API, OpenAI GPT-OSS, HuggingFace sentence-transformers, Scikit-learn, Pandas, NumPy, Chart.js, Arduino/HC-05 Bluetooth (IoT), Cursor, GitHub Copilot, Claude, Google Antigravity	

CERTIFICATIONS

AWS Cloud Practitioner (CLF-C02) Track Relevant Skills: Amazon Web Services (AWS), AWS Cloud Technology and Services, Cloud Computing	DataCamp June 2026
Introduction to Python by DataCamp Relevant Skills: Python, Data Analysis, Data Structures, NumPy, Matplotlib	DataCamp June 2026
Prompt Engineering with OpenAI API Relevant Skills: OpenAI API, Prompt Engineering Practices using OpenAI Models	DataCamp July 2026
